Optimise your entertainment and information offering for your guests: quite simply, cleanly and economically with services from a one-stop provider – with Axing.

Launch your television and Internet offensive now

And your guests will feel at home

Lay the world at your customers' feet – with television and Internet of the highest quality and virtually unlimited possibilities. As such, your international guests can also receive their home programmes in high-definition quality. They are connected to the internet reliably and quickly and can enjoy entertainment or work without disturbance in your hotel. To this end, we offer you complete solutions via which you can replace your existing media offering or enhance it qualitatively.

Perfect television and Internet solutions for you – and for your guests

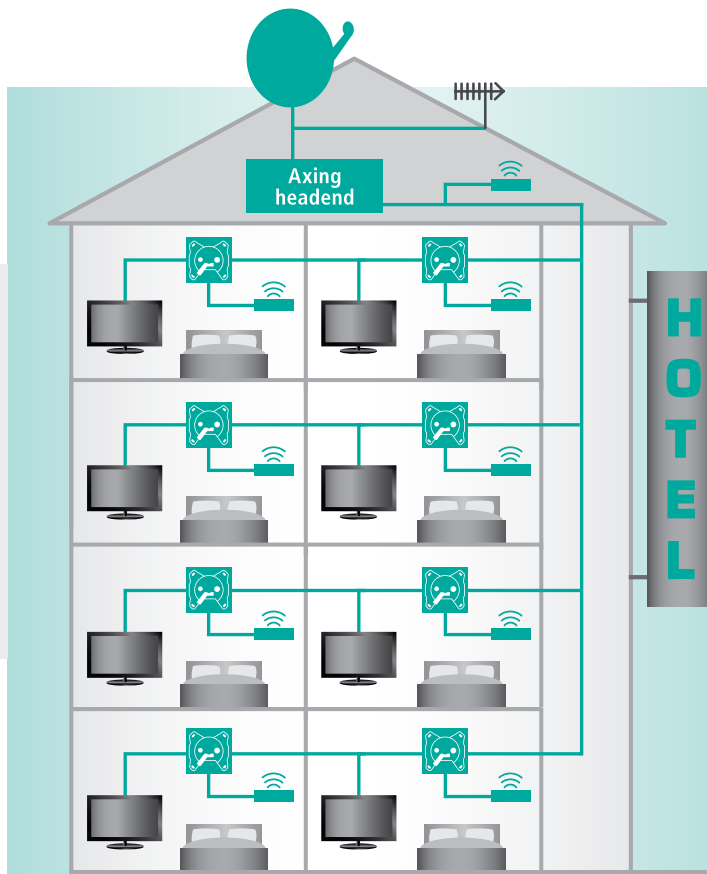

- Huge variety of programmes, notably optimum choice of foreign channels
- Secure Internet with high transmission rates throughout the entire hotel and its grounds
- Television with high-definition picture quality
- State of the art technology, durable components

And all this at minimum installation cost and even during ongoing hotel operation. Without the laying of new cables and therefore virtually dirt-free.

Optimum support with planning, delivery and operation

Clean, reliable, durable – all from a one-stop provider

From your own cable network via headend components and modulators or classic SAT-IF distribution using multiswitches through to reception-safe Internet distribution via coaxial cabling in your hotel – we offer you innovative, professional solutions and excellent service. We would be pleased to support you from the very outset with the planning of your system; we deliver the components required quickly and punctually and moreover, on request, supervise the installation conducted by the craftsman of your choice.

Switch to quality

Sound investment for the future in durable components

Are you seeking an economical solution via which you can satisfy your guests in the long term? With our offer you are sure to be on the safe side.

Headends from Axing

Optimum signal processing for satellite, terrestrial or cable signals. In-feed of info channels possible; easy to programme, maintain and install – reliable and durable.

Multiswitches from Axing

Distribution of satellite and terrestrial signals via existing cable structures, several hundreds of connections can be realised.

Ethernet over Coax from Axing

Reliable and fast in-house Internet distribution via existing coaxial structures.
