Your advantages at a glance:

Competence in
Communication
Technologies

- ✓ Minimum installation time due to a ready-to-use pre-installed system
- ✓ Service- and mounting-friendly
- ✓ Large installations with up to 46% saving in space
- ✓ Always the same output levels per stack
- ✓ 3 stacks possible, i.e., a system with up to 108 connections
- ✓ A large number of combinations can be implemented in modular design
- ✓ Security due to a lockable system
- ✓ Continuous grounding of the system even when service is required
- ✓ Optionally: CATV amplifier can be integrated on the mounting plate

System 5-3-2

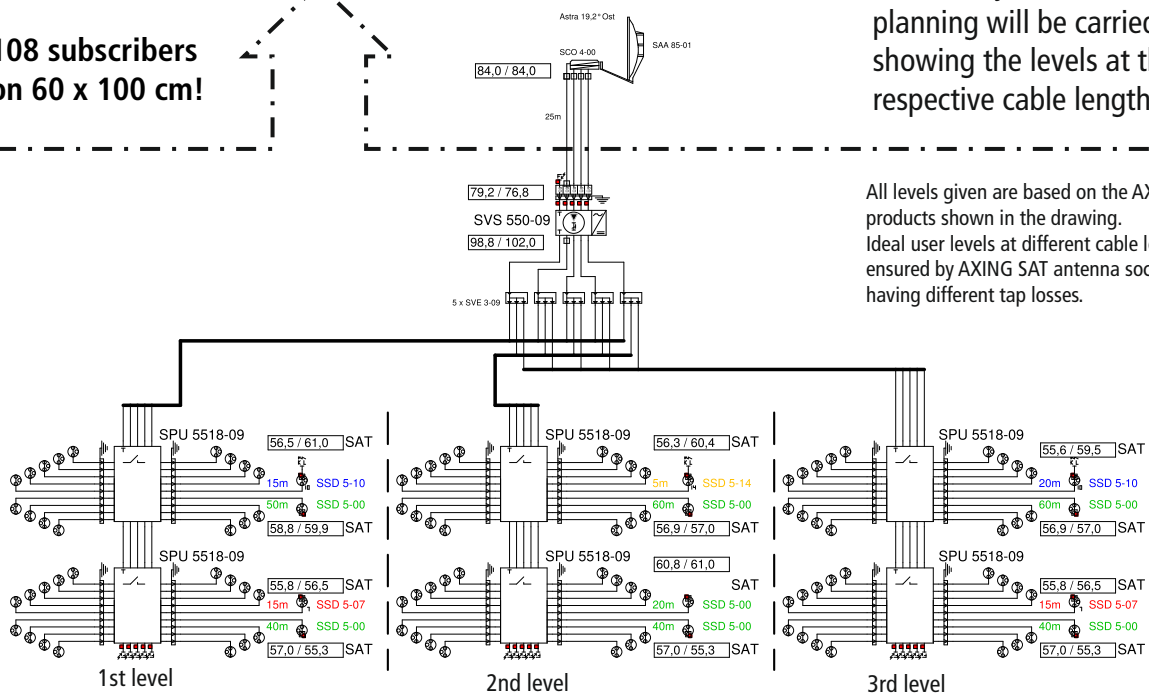

**108 subscribers
on 60 x 100 cm!**

Planning service:

For each system, detailed planning will be carried out, showing the levels at the respective cable lengths.

All levels given are based on the AXING products shown in the drawing. Ideal user levels at different cable lengths ensured by AXING SAT antenna sockets having different tap losses.
